Areas of Activities

SMART SOCIETY

1. apps for society

TECHNOLOGY

1. sensors
2. data analysis
3. high technology
4. security
5. public safety

MOBILITY

1. Intelligent transport systems
2. public transportation

Request

Distribution in Western European countries

Application for fraud detection and alert in metro accesses is looking for distributors to extend its sales across Western Europe (FRA, UK, BE, IT).

The application is fully approved by the first customer in Barcelona and it is currently under its international commercialization phase.

See more details in <http://www.awaaait.com/appdetector>

Keywords: artificial intelligence mobile transport metro fraud detection

Cooperation Requested

1. Sales / Distribution

Request

Financing to accelerate international growth

We have successfully developed an application that detects and sends real time tailgating alerts at metro accesses (fraud detection and eradication). We are in the early commercialization phase.

In order to increase our financial capability for extending additional pilots in European Countries initially (FRA, UK, BE, IT), we are evaluating the possibility of incorporating external funding.
