Description

Maptionnaire - Gather citizen insight for flourishing cities

Mapita is a Finnish startup company. Our mission is to gather citizen insight for flourishing cities. Our cloud-service [Maptionnaire](http://maptionnaire.com) enables gathering of people's feedback in usable form for planning. Currently, knowledge-driven decisions about the future of cities are hard to make, when relevant and usable information is missing. People want to give feedback, but the flooding comments are not in usable form for planning. Maptionnaire's custom survey builder in a cloud is a leading solution for map-based questionnaires to gather local insight. It enables integrating the citizen insight into the planning and decision support systems. More efficient and influential public participation with Maptionnaire generates trust, and smarter participation leads to wiser and more sustainable planning outcomes.
