Description

DOMOTYS is a Spanish cluster founded in 2010. Currently works with more than 100 companies from all over Spain related with home and building automation and Smart Cities fields. Our main challenging goal is to improve competitiveness of the industry offering numerous tools as: seminars, workshops, training, technological surveillance, editing specialized books, catalogues, or any other dissemination products. Related with international cooperation, DOMOTYS works with universities, research centres, companies and public bodies providing technical advice and promoting networking among all the stakeholders involved. The cluster plays a key role in fostering internationalisation and competitiveness within its members, with the support of the Spanish Government, autonomous regional bodies and European Union. DOMOTYS has the pleasure to collaborate with its members and other organisations in both national and international projects, by providing it expertise and dissemination skills.
