Bilateral Meetings

- Wednesday (12:00pm - 2:00pm)
- Thursday (10:00am - 12:00pm)
- Thursday (12:00pm - 2:00pm)

Description

Bit4id was established in 2004, aimed at developing simple, secure and homogeneous technologies for authentication, digital signature and cryptography. The digital identity is required to digitally sign documents, to establish a secure connection, to encrypt data and messages. •The PKI-based technologies ensure the univocal binding of the physical identity to the digital identity. •Bit4id works in the field of cryptography and digital identity, making use of the PKI (Public Key Infrastructure) technologies
