Description

Shotl is the last mile commuting service for the price of a coffee cup. As flexible as a taxi, and 60% cheaper. Insert your destination, connect with a ride going your same way and get picked up in just a few minutes. A comfortable minibus will pick you up and take you wherever you need to go. An on board navigation will help your driver to always pick up the best route. We envision a future where citizens can use a reliable, on demand, affordable public transportation service making useless the ownership of private car for daily urban or suburban trips.
