Bilateral Meetings

- Wednesday (12:00pm - 2:00pm)
- Wednesday (2:00pm - 4:00pm)
- Wednesday (4:00pm - 6:00pm)
- Thursday (10:00am - 12:00pm)

Description

Dual Inventive strongly believes in the further development and utilisation of the 'railway system' as a sustainable and attractive transportation mode in the future. Dual Inventive develops and produces technology products that serve to make working on railway infrastructure safer and more efficient, to maximize rail capacity, and to improve the reliability of the railway infrastructure. Products are 1) ICT systems connected to electronics and mechatronics which serve optimal work area safety in rail infra building projects, 2) sensors to monitor temperature of rail and environment which serve a rapid response when temperatures of rail tracks reach the installed thresholds, 3) databases connected to apps which form a solid infrastructure for safe communication in and around the track (organise your safety projects in one central system, being 24/7 in control by real-time status overview of rail work areas and all installed safety equipment).

Offer & Request

Cooperation with Spanish companies/institutions in offering railway safety products to the market

We offer exclusive technology products for the Spanish market that serve to make working on railway infrastructure safer and more efficient, to maximize rail capacity, and to improve the reliability of the railway infrastructure.

Is there a market in Spain for our products?

Are there companies or institutions that can function as a launching customer?

Are there companies or institutions that can cooperate with us in organising official acceptance of our products within the existing regulations or bring us in contact with decision making parties?

Cooperation Offered

1. Sales / Distribution
2. Technical co-operation
3. Outsourcing co-operation

Cooperation Requested

1. Sales / Distribution
2. Technical co-operation
