Bilateral Meetings

- Wednesday (10:00am - 12:00pm)
- Wednesday (12:00pm - 2:00pm)
- Wednesday (2:00pm - 4:00pm)
- Wednesday (4:00pm - 6:00pm)

Description

Metrica6 is an engineering R&D company based in Malaga (Spain). We are specialist in product development from its ideal conception, technical development, production planning to marketing strategies. We also develop our own projects. As an example, we have created NESS, a smart device that saves water at home. NESS solves the problem of letting a huge amount of cold water be wasted everytime we want to use the hot water. From now on, whenever you want to take a shower, you don't have to waste water waiting for it to be hot.

4. sustainability

Request

Financial and industrial partners

We are looking for financial and industrial partners to expand our product in Spain and abroad. We have created NESS, a device that saves the water you usually wasted when you want to use hot water and it flows cold at the beginning. We are now expanding business in Spain but also has the interest in UK and EEUU internationalization.

Cooperation Requested

1. Investment/Financing
2. Sales / Distribution
3. Manufacturing agreement
4. License agreement

Offer

European and Smart city projects

As an engineering R&D company, we work as a partner in European consortium projects for smart cities and other areas. Let's meet and see what we can work together in.

Cooperation Offered

1. Outsourcing co-operation
2. Technical co-operation

Offer

Product developer. Engineering and R&D

We are a engineering R&D company based in Malaga, responsible for the creation and commercialization of and innovative way to save water at home: NESS (www.nesswater.com). This is an example of our product development service, which covers from concept to prototyping, manufacturing plan and marketing strategy. We are not only

consultants, we are the developers of the technology.

Cooperation Offered

1. Outsourcing co-operation
2. Technical co-operation

Request

Looking for partners in the installation/construction for sustainable product

NESS is a smart device for saving water at home. It can be easily installed during the construction of a dwelling or in already built houses. Due to the huge business opportunity it grants, we are looking for partners in the installation and construction sector, which would like to take part of this sustainable project: any type of installers, from solar panels to security systems, architects and engineers, constructors or even manufacturing, environmental associations, distributors or other commercial, financial or industrial partners.

Cooperation Requested

1. Sales / Distribution
2. Technical co-operation
3. Outsourcing co-operation
