Areas of Activities

SMART SOCIETY

1. Citizen services
2. liveable city
3. entrepreneurship
4. apps for society

TECHNOLOGY

1. Services integration
2. city platform
3. Internet of things cloud

4. geo information
5. networks
6. data analysis
7. high technology
8. high technology

MOBILITY

1. Intelligent transport systems
2. sharing services & infrastructures
3. public transportation
4. service integration

Offer & Request

Leveraging the Internet of Public Things

The «Beacon Hub Network» easily connects public spaces and street furnitures with citizens and data through mobile technologies. By deploying connectors on public places and an Open platform, local communities can leverage the “Internet of Public Things”. By integrating a SDK, any mobile app can interact with the real world. By deploying open connectors, an open platform and API's, we leverage the technology by engaging the community and further stimulate the local startup economy.

Connectthings global SaaS platform integrates multiple technologies (NFC, Bluetooth Low Energy, WiFi, GPS, QR codes, etc.) to manage beacons on public objects and their related contextualized mobile interactions.

Connectthings have won +15 International Awards (London, San Francisco, New York, Barcelona ...) for its innovative solutions and its customers are:

- +20 cities among the smart cities in the World (Madrid, Barcelona, Bordeaux, Valencia, Lyon, Montpellier, Nice, Strasbourg Rio de Janeiro ...)
- Large groups: JCDecaux, Cemusa, Keolis, SNCF, Banco Santander, Spain Orange, Vodafone ...
