Areas of Activities

SMART SOCIETY

1. social innovation
2. equity
3. liveable city
4. regeneration
5. collaboration
6. social well-being

TECHNOLOGY

1. city platform
2. sensors
3. Internet of things cloud
4. big data
5. visualization
6. geo information
7. data analysis
8. standardization
9. security
10. public safety

GOVERNANCE

1. PPP
2. funding
3. efficient government
4. economic development
5. fiscal and legal framework
6. involvement, partnerships collaboration

ENERGY

1. Climate change
2. renewables
3. grid architecture
4. regulations
5. zero carbon
6. efficiency
7. retrofitting

MOBILITY

1. Intelligent transport systems
2. mobility on demand
3. pedestrians
4. urban cycling
5. public transportation
6. community
7. electric vehicle

8. transport investments (Markets & Projects)
9. logistics of Rail Freight

SUSTAINABLE CITY

1. Urban growth
2. green building
3. liveable cities
4. architecture
5. water & waste management
6. urban redevelopment
7. city strategy
8. regeneration
9. sustainability

Offer & Request

Urban Development, Infrastructure and Smart City Demonstration Projects

Atkins (www.atkinsglobal.com) is one of the world's leading design, engineering and project management consultancies, employing some 18,000 people globally. Our people's breadth and depth of expertise and drive to ask why has allowed us to plan, design and enable some of the world's most complex and time critical projects including integrated urban development projects and strategies, metro and transport systems, ports, special economic zones and housing programmes and plans as well as strategies for energy security and water resources. We have a long track record in making innovation a full part of what we do across all sectors and bring collaboration, insight, tools and thought leadership to our clients and partners.

We have worked with national governments, cities, service providers and developers to prepare and co-create plans and projects for urban development, infrastructure, environmental and economic development initiatives. These respond to existing and future needs in ways which are integrated and smart and which deliver tangible economic, social and environmental benefits. We are able to bring advice on leveraging investment and developing strategies for implementation and delivery.
