Offer

Automatic Fare Collection System

ATEC T& offers fast and secure transportation service.

Automatic Fare Collection, AFC is the system that citizens are able to pay fare using smart cards. By tagging the card, people will shorten the time of queueing up for ticketing and payment in the previous system. In AFC system, one second is enough.

Organizations and corporations who manage the bus, metro and taxi will also benefit from AFC. Now that all transaction data is transmitted from on-board equipment to the center automatically, organizations and corporations will be free of accounting error. Furthermore, analysis of transaction data will be useful for the management planning.

Thank you for your consideration of our offer. We are confident that we would satisfy all the people in relation with public transportation.
