Bilateral Meetings

- Wednesday (10:00am - 12:00pm)
- Wednesday (12:00pm - 2:00pm)
- Wednesday (2:00pm - 4:00pm)
- Wednesday (4:00pm - 6:00pm)

Description

We are digital technology pioneers specialised in **mobile software development**.

Innopro Advanced is formed by a multidisciplinary team of engineers and business managers who strive to help clients achieve their goals by turning their ideas into digital reality.

Over 10 years of experience in digital engineering allows us to offer full range of services that are truly personalised to each and every customer. From intelligent **M2M solutions** to incredible **Smart Cities inventions**, we have everything to help companies adapt in the digital revolution.

Our team has participated in development of intelligent solutions in sectors such as **weatherisation**, **energy efficiency** and **home comfort**, striving to allow people to have simpler and more efficient lives.

Areas of Activities

SMART SOCIETY

1. liveable city
2. collaboration
3. apps for society

TECHNOLOGY

1. Services integration
2. city platform
3. sensors
4. Internet of things cloud
5. apps
6. geo information
7. high technology
8. city rooms

GOVERNANCE

1. entrepreneurship
2. involvement, partnerships collaboration

ENERGY

1. efficiency
2. management
3. metering

MOBILITY

1. mobility on demand
2. parking
3. logistics of Rail Freight

SUSTAINABLE CITY

1. liveable cities
2. water & waste management
3. city rooms
4. sustainability

Offer

Apps for Internet of Things

We love to solve Internet of Things and Smart Cities puzzles.

Because of our engineering expertise we have been chosen to be one of Telefonica's M2M Global Partners. Working

together with this tech giant we develop solutions that allow people to connect real world environment to the Network to make their lives more comfortable and sustainable.

Every product that we develop is designed by using the latest trends and technologies in the market. When developing apps for smartphones and tablets we always use native language, Java for Android and Objective-C for iOS.

Cooperation Offered

1. Outsourcing co-operation
2. Technical co-operation

Offer

Mobile Application Development

Even if you desire to build a beautiful online store or a sophisticated home climate controller, we are fully equipped to make it all happen.

Then we design. We use beautiful and engaging layouts, matched only by intuitive and innovative user interfaces.

Finally, we do what we like the most - we develop. We shape our applications in commercial and complex technology fonts and make them easily accessible for both iOS and Android users

Offer

Custom Software Development

We are digital technology pioneers. We have been developing software for more than 10 years now, therefore, we are capable of answering even the most challenging client briefs and offer them wide service portfolio, from vending solutions to CRT products.

We invest a lot of time to each and every customer to ensure that we fully understand their requirements. Then we developed a custom software that is unique and truly personalised to achieve all the objectives set for the project.

Every product that we develop is designed by using the most up to date technology in the market. When developing custom software solutions we use different tools: Java, PHP, Ruby, Python, just to mention few.

Offer

Website Development

We design our websites to be responsive and fully optimised across multiple platforms to make a big impression even through a small screen. Each and every site we create is one of a kind and tailored to the business that it represents. We strive to earn you top rankings on search engines and provide you with cutting-edge technology combining with astonishing looks.

Not to mention our very own design team that creates visuals that speak louder than words.
