## Bilateral Meetings

- Wednesday (12:00pm - 2:00pm)
- Wednesday (4:00pm - 6:00pm)
- Thursday (12:00pm - 2:00pm)
- Thursday (4:00pm - 6:00pm)

## Description

We offer cities to use the power of crowd-sourced parking data to make in-city traffic and parking management easier and cost efficient with minimal budget. Our unique patented CrowdPark technology help the city to better use its existing on-street parking resources. We can tell drivers 5 minutes before a specific on-street parking space is being vacated and guide them there, completely automatically. Our technology is used by dozens of developers and millions of users to provide 24/7 parking availability services with no battery impact. With 1 billion parking events, Anagog's technology provides the city with real immediate value.

Areas of Activities

## SMART SOCIETY

1. Citizen services
2. social innovation
3. apps for society

## TECHNOLOGY

1. big data
2. apps
3. geo information
4. data analysis

5. high technology

## **MOBILITY**

1. Intelligent transport systems
2. parking

## **SUSTAINABLE CITY**

1. city strategy

Offer

### **Crowd-sourced parking system**

We offer cities the most efficient and cost effective method to plan and manage their traffic and on-street parking spaces. Anagog's new patented crowd-sourced technology was already deployed in many apps used by millions of drivers worldwide. No more installations of expensive sensors and equipment. Smart use of technology for your smart city.

Keywords: parking traffic management sensors

Cooperation Offered

1. Sales / Distribution
2. License agreement
3. Technical co-operation

Request

### **App developers are welcome to use our mobility status SDK for free**

Join over 50 app developers and over 10 million users from around the world and uncover the huge potential of the Anagog mobility status SDK for you and for your end users. Join us today to disrupt the market with the world's largest crowd-sourced parking network!
