Areas of Activities

TECHNOLOGY

1. Services integration
2. sensors
3. high technology
4. high technology

Offer

Machine vision technology

We offer our machine vision technology know-how in order to create new products based on image processing techniques. The field where we have most specialized is 3D reconstruction for metrology, robots guidance, etc.

Keywords: Machine vision image processing metrology 3d reconstruction R+D

Cooperation Requested

1. Outsourcing co-operation
2. Technical co-operation

3. Sales / Distribution

Offer

WheelPro system

An automatic wheel profile measurement system focused on the railway sector. We offer a tool for measuring and managing wheel tread data in order to optimize maintenance of rolling stock in terms of safety, confort and money.

Keywords: wheelpro wheel profile measurement predictive maintenance rolling stock
maintenance wheelset 3d reconstruction machine vision image processing

Cooperation Requested

1. Sales / Distribution
