- Thursday (10:00am - 12:00pm)
- Thursday (12:00pm - 2:00pm)
- Thursday (2:00pm - 4:00pm)
- Thursday (4:00pm - 6:00pm)

Description

livn is a smart and user friendly irrigation system, designed to integrate both climate and sensors information through proprietary algorithms, enabling it to decide when and how much water to use, saving up to 60% on water consumption. By enabling irrigation optimization through foolproof remote controlling and monitoring. Our most complete solution eliminates the need for any human interaction by providing a complete automatic optimized irrigation system, integrated by a central system controller and sensors through all monitored areas. Despite automation, fine-tuning and timer control is always available through our foolproof apps. Our system will allow for complete control and fine tuning of your home system remotely from anywhere in the world. Both remote programming and full smart mode will save you time and money.
