6. procurement

SUSTAINABLE CITY

1. Urban growth
2. liveable cities
3. city strategy

Request

Support for the design of a Smart City Public Policy

We are currently working on the design of a Smart City Public Policy that creates a general framework for local governments to implement Smart City initiatives in a coordinated and efficient way.

As such, we are looking for technical cooperation in the construction of the document and we are also interested in looking for companies that are willing to cooperate with the Colombian government in the implementation of pilot projects after the Public Policy is in Place.

We believe that the creation of such a policy for Smart Cities, will generate a momentum in the sector that will be beneficial for all parties, mainly citizens who should be the center of the Smart City implementations.

If you believe you can cooperate with us in the creation of a technology neutral framework, please do not hesitate to contact us.
