Bilateral Meetings

- Wednesday (10:00am - 12:00pm)
- Wednesday (12:00pm - 2:00pm)
- Wednesday (2:00pm - 4:00pm)
- Wednesday (4:00pm - 6:00pm)

Description

Neural Labs is a software developer specialized in recognition technologies (License Plate Recognition software)

Neural Labs SL develops and provides software for **Vehicle License Plate Recognition (ALPR- ANPR)**, **Shipping Containers ID Recognition (CCR)** and **Cargo Trains ID Codes Recognition**, based on artificial vision, since 2005.

Led by entrepreneurs with more than 15 years of experience in systems of optical character recognition (OCR), **Neural Labs** is a technology company with deep commitment to growth, devoted to providing solutions in the area of machine vision through the integration of systems, consulting services and full technical support.

Since the company start-up, **Neural Labs** products have been highly appreciated for their effectiveness in optical character recognition in uncontrolled environments. **Neural Labs** implements continuous improvement based on latest technologies available, providing high reliability in all its products.

Services provided:

In addition to our **OCR software licenses** we can provide:

* Maintenance agreement for all our OCR engines (Container, ANPR, Dangerous Goods, Train ID etc)

* Consultancy & advice in:

- Software architecture
- Hardware architecture and election (*)
- Development

* This consultancy can be anywhere in the world. **In-field commissioning assistance** (*recommended at least for the first installation*)

* We can also provide some **custom development** if necessary to adapt our OCR engine to any special need

Neural Labs **collaborates with key software developer and integration Companies** to offer a turnkey Solution (*)

(*) For instance: Integrating and indexing the OCR results with most of the Security Recording platforms, or with Companies offering handheld mobile solutions

Areas of Activities

TECHNOLOGY

1. Services integration
2. data analysis
3. high technology
4. security
5. public safety

MOBILITY

1. Intelligent transport systems

Offer

License plate recognition in an urban environmen (City LPR Server)

- City LPR Server (CLR) Is the Neural Labs system for License plate recognition in an urban environment.

- Connected to police databases can detect:

- Stolen Vehicles.
- Vehicles without Insurance .
- Vehicles without technical inspection.
- Vehicles with pending fines.

▢ etc

- CLS, Recognizes continuously license plates from moving vehicles (Free-Flow).
- CLS, works with different camera vendors and protocols at the same time.
- CLS, cooperates with network video recording systems like:

▢ Bosch

▢ IndigoVision

▢ Milestone

▢ AxxonSoft, TYCO, PELCO, SCATI... among others

- LPR CITY SERVER can process tens of megapixel cameras at the same time. Each camera can process up to 2 lanes. The power of the system allows you to monitor a lot of lanes from a single server

Cooperation Offered

1. License agreement

Offer

License Plate Recognition OCR for Traffic (IT), Parking, Access Control, Speed Radars.

LPR, ANPR: Recognition engines: Containers, Trains ID, IMO & ADR hazard plates.

Cooperation Offered

1. Technical co-operation
2. Sales / Distribution
