- Thursday (4:00pm - 6:00pm)

Description

Distromel is an ICT company that combines R&D departments in the areas of electronics, information technology and mechanics for the purpose of designing and developing products in different sectors. Today, the focal point of the company's activity is the Environment Services product line. Distromel's mission is to speed up and control the general management of services such as waste collection and street cleaning, areas which require the type of control systems in which the company specialises. Distromel's urban services management solutions comprise a number of different products, including global positioning systems (GPS), container identification systems featuring RFID technology, and onboard container weighing systems installed in vehicles.
