4. public transportation
5. service integration
6. community

SUSTAINABLE CITY

1. liveable cities
2. water & waste management
3. city strategy
4. regeneration
5. sustainability

Offer

Citizen Canvas - Award winning Smart city planning & collaboration tool.

The Citizen Canvas takes bottom-up, citizen generated explicit data with top down, sensor-generated implicit data to create a unified picture for a smart city pilot/service. ⬚⬚Based upon the well known "Business Model Canvas" tool, the Citizen Canvas applies the same collaborative approach to the design of smart cities by making the connections between different city departments, businesses, communities and service providers visible across city's application, service, data and infrastructure layers.

Citizen Canvas was the winning entry at the smart city showcase at Smart City Expo last year. Since then its been piloted in 6 cities.
