- Wednesday (12:00pm - 2:00pm)
- Wednesday (2:00pm - 4:00pm)
- Wednesday (4:00pm - 6:00pm)
- Thursday (10:00am - 12:00pm)

Description

We at Senego fight against old habits by helping our customers measure their environmental impact, and choose, predict and decide better. We have created and patented an environmental measurement system for all components of environmental efficiency in the property market. We can provide advanced measurement, analytics and optimization for property owners and users.

4. apps
5. data analysis

ENERGY

1. zero carbon
2. efficiency
3. metering

SUSTAINABLE CITY

1. product cycle
2. sustainability

Offer & Request

Environmental measurement proposal for property owners with positive ROI

Seneqo has created a solution for making sustainable decisions and getting a positive ROI while doing it.

In the property market,

Just by measuring the energy consumption, you can save 2.4% in costs, and this increases by 5% when measured and optimized in real time using our solution. Property owners can charge a 3% premium for environmentally friendly office space.

In the future this will be required by law.
