6. networks
7. data analysis
8. high technology
9. public safety

ENERGY

1. Climate change
2. efficiency

3. ICT

SUSTAINABLE CITY

1. liveable cities
2. sustainability

Offer & Request

Intelligent lighting

We are looking for partners to join the smart lighting revolution:

Connected luminaires with open interfaces allows cities to add different sensors and equipment that need internet-connection directly to the lighting infrastructure. We are seeking for partners to provide such fascinating opportunities for our customers.

We are also currently in the process of expanding our business to major markets and therefore looking for sales partners. We are also open to discuss about licensing our solution.
