Description

Ackcent is a company specializing and exclusively dedicated to provide **cybersecurity services and solutions**. Our aim is to effectively protect the digital assets of our customers.

Ackcent is specialized in the provision of services for the protection of critical digital assets and our professionals has an exceptional experience in cybersecurity for critical environments of public and private organizations internationally, with presence in UK, USA and Mexico. With headquarters in Barcelona, specifically designed to adapt to the cybersecurity particular needs of each customer, to ensure the quality and the projects' success in which it participates.

Aligning security and business strategy: to digitally secure a business, technology alone is not enough. Strong digital security business management plays an equally important role. Ackcent offers personalized senior-management advice that provides the background, rationale and business practical advice to minimize the impact of cyber incidents.

Assessing and managing vulnerabilities: In order to protect a digital business, knowing its vulnerabilities is a must. Ackcent Red Team's services are ethical hacking audits and pentest focused on gathering valuable security information from any computing and organizational environment and turning it into actionable insight.

Managing cloud security services: With the growth of cloud services, security is more important than ever. Ackcent offers mission-critical services to detect, respond and manage cyber-attacks. Ackcent cloud security services address and monitor 24/7 security challenges that might take place both in public and private cloud environments.
