smartcities made with love

SmartCity

The SmartCity improves, through the technology, at least one of the next experiences:

energy, mobility, collaboration, tourism and shopping.

SmartCity

With mobile technology

Commerce

Offer tools to the commerce in order to get a better connection with the citizens and to reduce the escape of customers.

Participation

Encourage the citizen to participate actively in the events, activities and services related with the city.

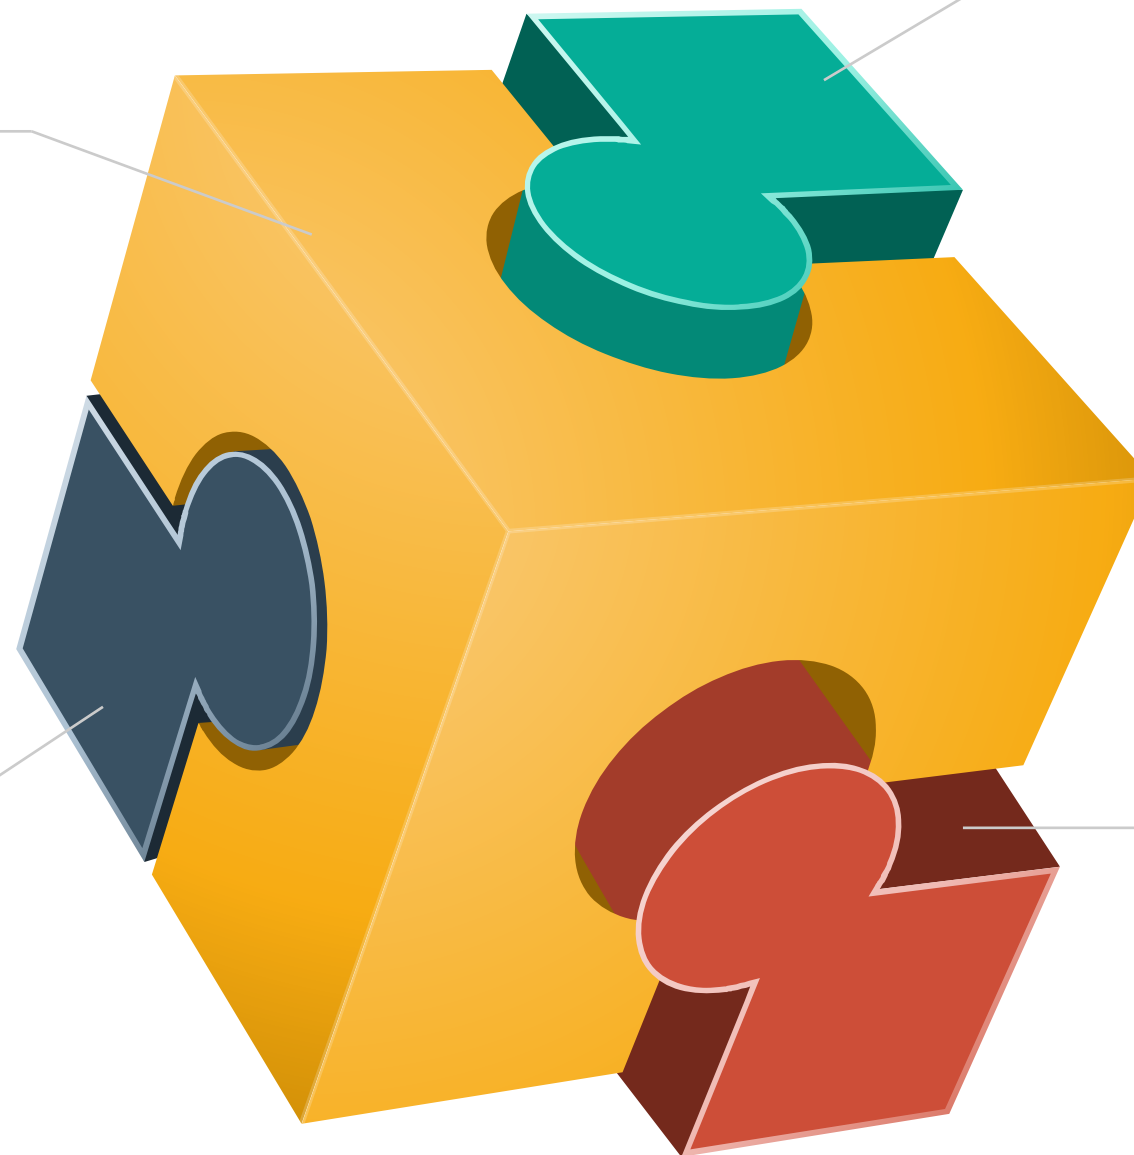

Culture and tourism

Easy access to culture schedule of the city, and help to the visitants to plan an original stay.

Mobility

Contribute to the emission reduction through a more efficient use of public transport.

Your city App

Easy access to every service

Public transport

Access to the status of public transport, schedule and geolocation of every station.

Local commerce

Direct access to all commerce offer. Every commerce will be able to use the mobile technology.

Cultural schedule

Make easier to access to every event of culture.

Municipal notices

Access to interest information and real-time reception of municipal notices.

Pharmacies

Access to every pharmacies, location, schedule and 24hour-pharmacies.

Free time and restaurants

Access to every offer of free time and restaurants.

Tourism and Sports

Information about tourism and sport activities to plan original and authentic stays.

Collaboration

Citizen participation in order to communicate public road incidences.

Your **SmartCity** in an App

We offer to you the most advanced technology in order to convert your city in a great experience in every sense, improving the relationship with your citizens, tourists, local entities and environment.

Every citizen will have access to every service and commerce directly and easily.

Pharmacy and Medical

Sport

Public transport

Every App of the City

Can you imagine to offer an App to every entity of the city?

Every entity could manage their own contents in their own mobile App.

And all this environment, ¿available in only one installed mobile application?

Geolocation

Access to every application according with your location. Find your nearest Apps.

Categories

Access to every application according with every category of every entity.

Search

Find through the name of the entity or related keywords.

Solution in 4 levels

We work on 4 levels to offer you an **unique service** in the market

One App for everyone

You will be able to offer and distribute Apps in your area. As much as you distribute, your channel will get more powerful.

App of Apps

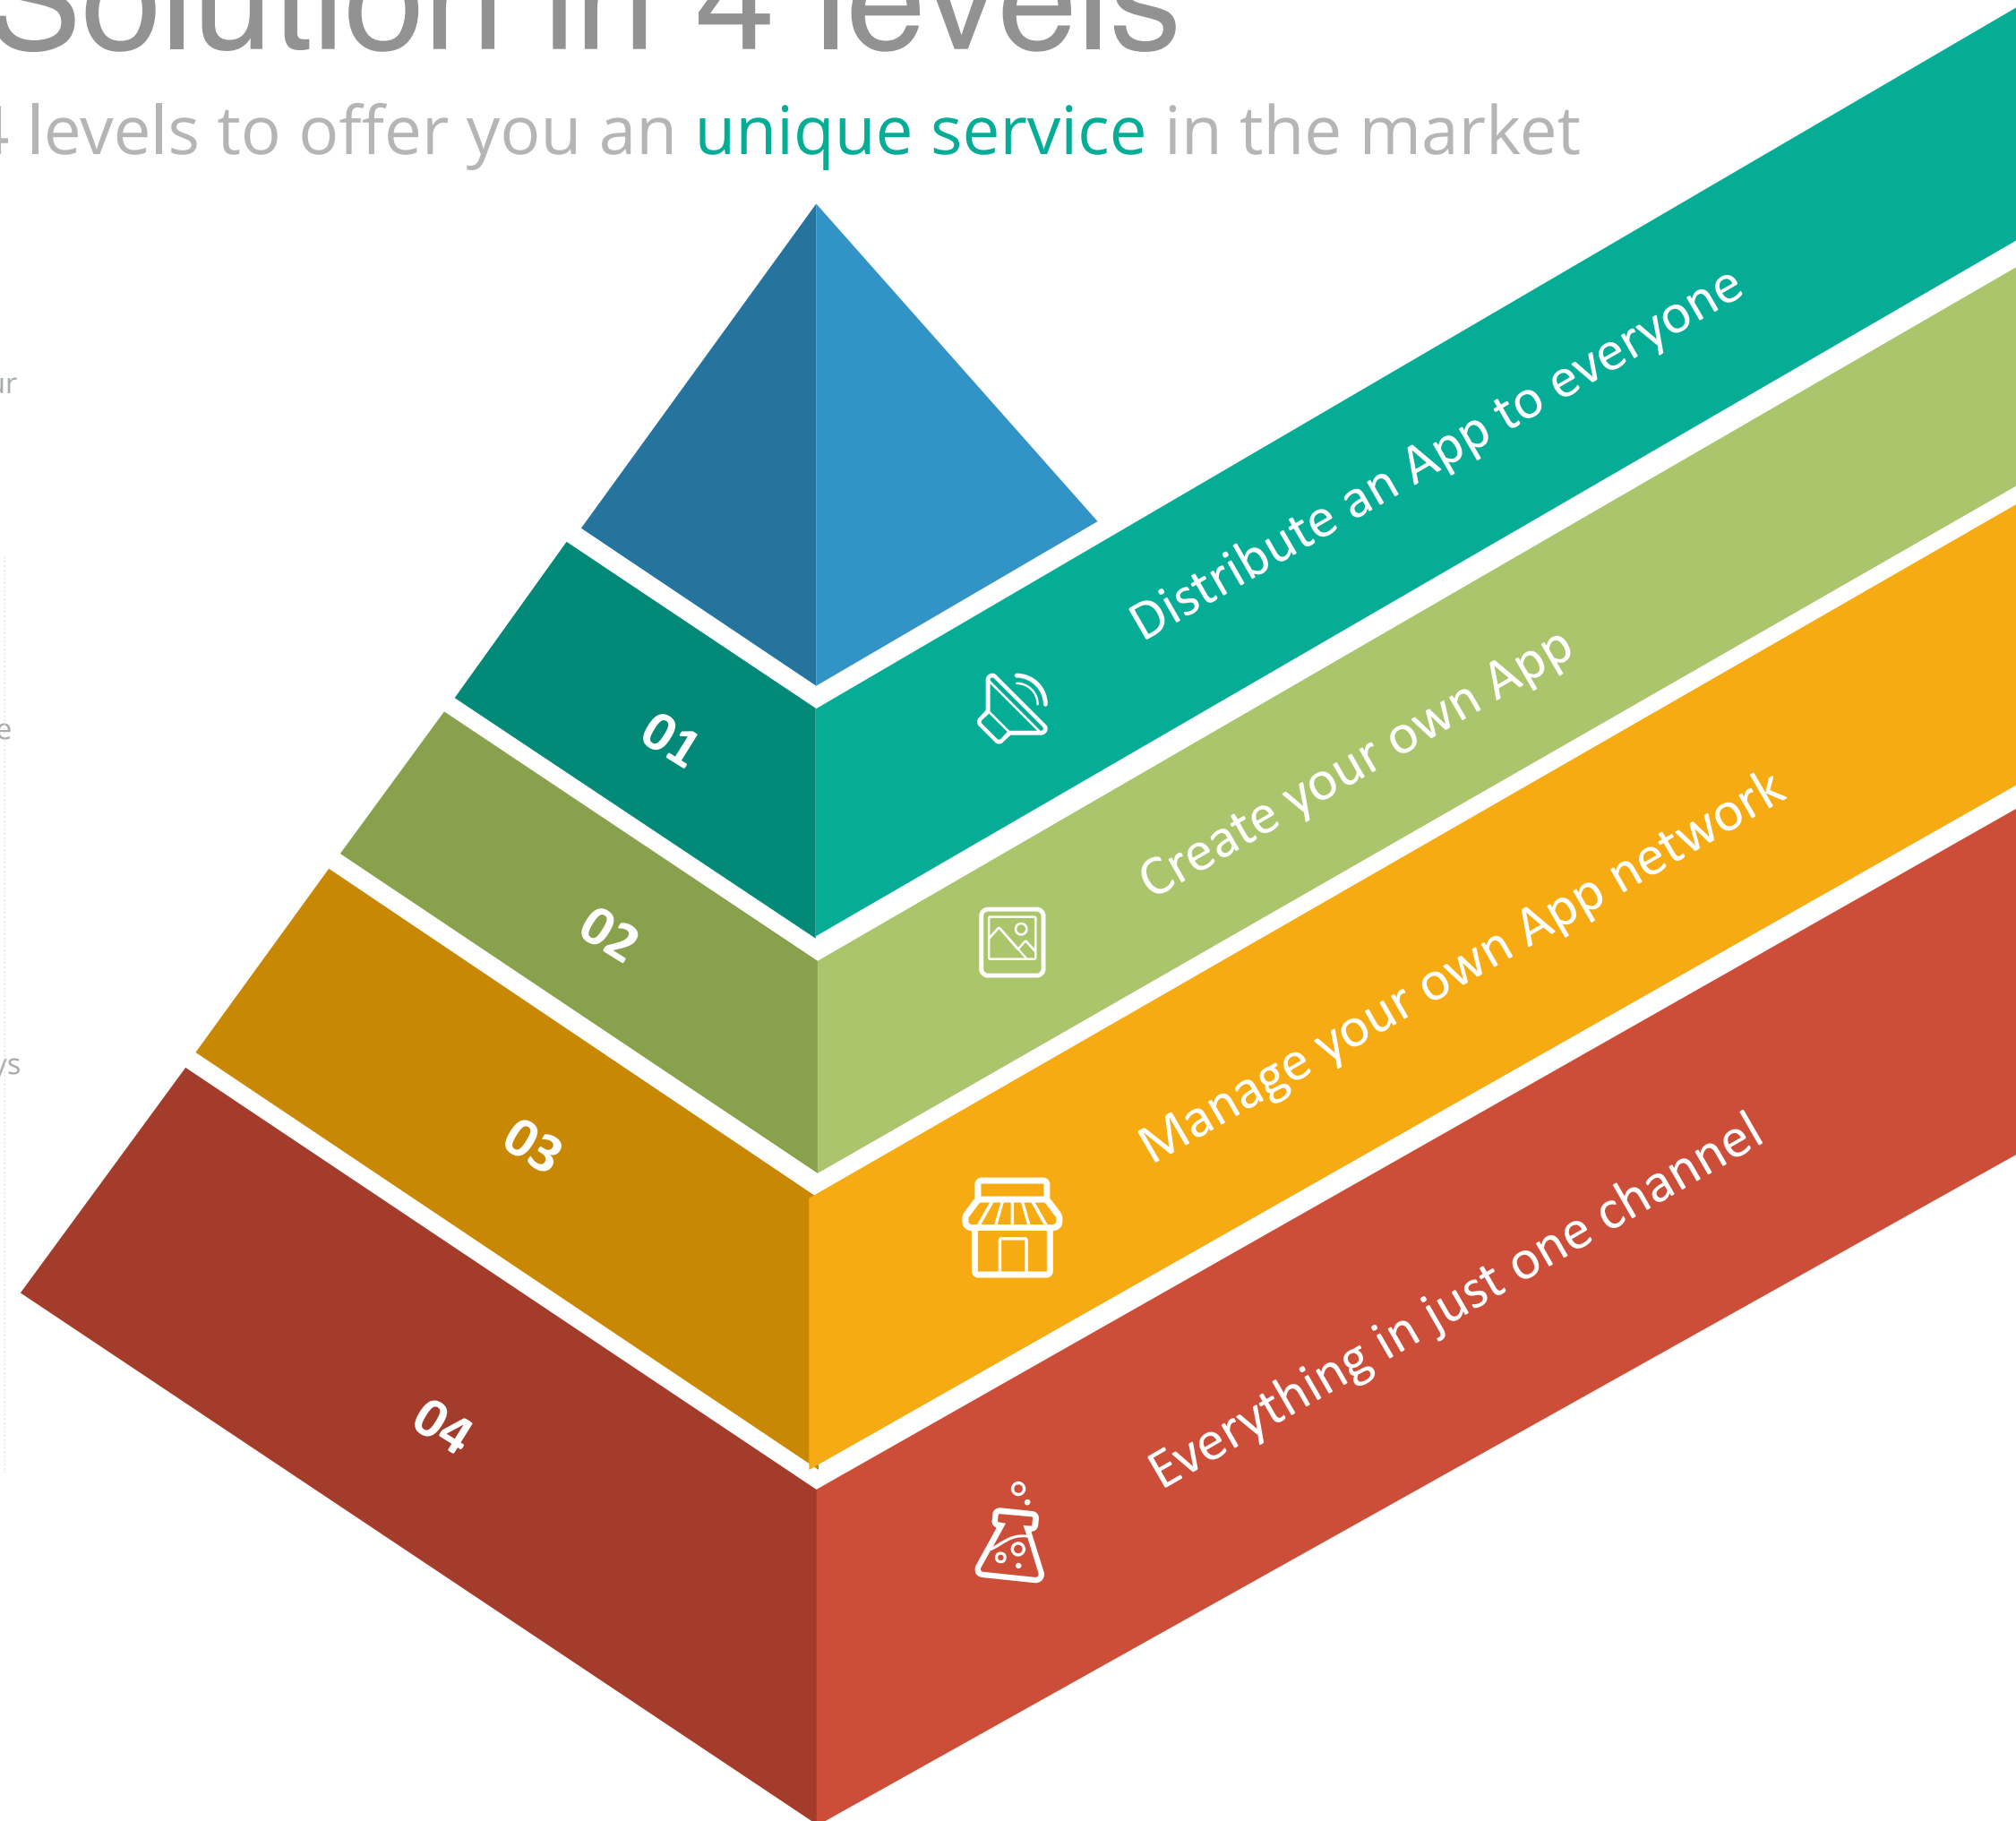

It will be useful for all the users to access to all the Apps of your network.

Your App network

You will manage your own App network. You decide who has or not an App and they will always be in your community.

One unique channel

Imagine the power of a communication channel that involves all the Apps of a geographical zone. How many users would it have?

How many Apps do you need?

Apps Evolution

We create **unique Apps** for your platform

Specific usability

Android and iOS aren't the same and their users know it. That's why we have developed specific usabilities for each platform. Your users will appreciate it.

WebApp version

This version lets your Apps be compatible with all the smartphones of the market.

Viral diffusion

What is more effective than diffusion made by your own satisfied users? Your Apps are accessible via Facebook, Twitter, WhatsApp, Line...

Native version: iOS & Android

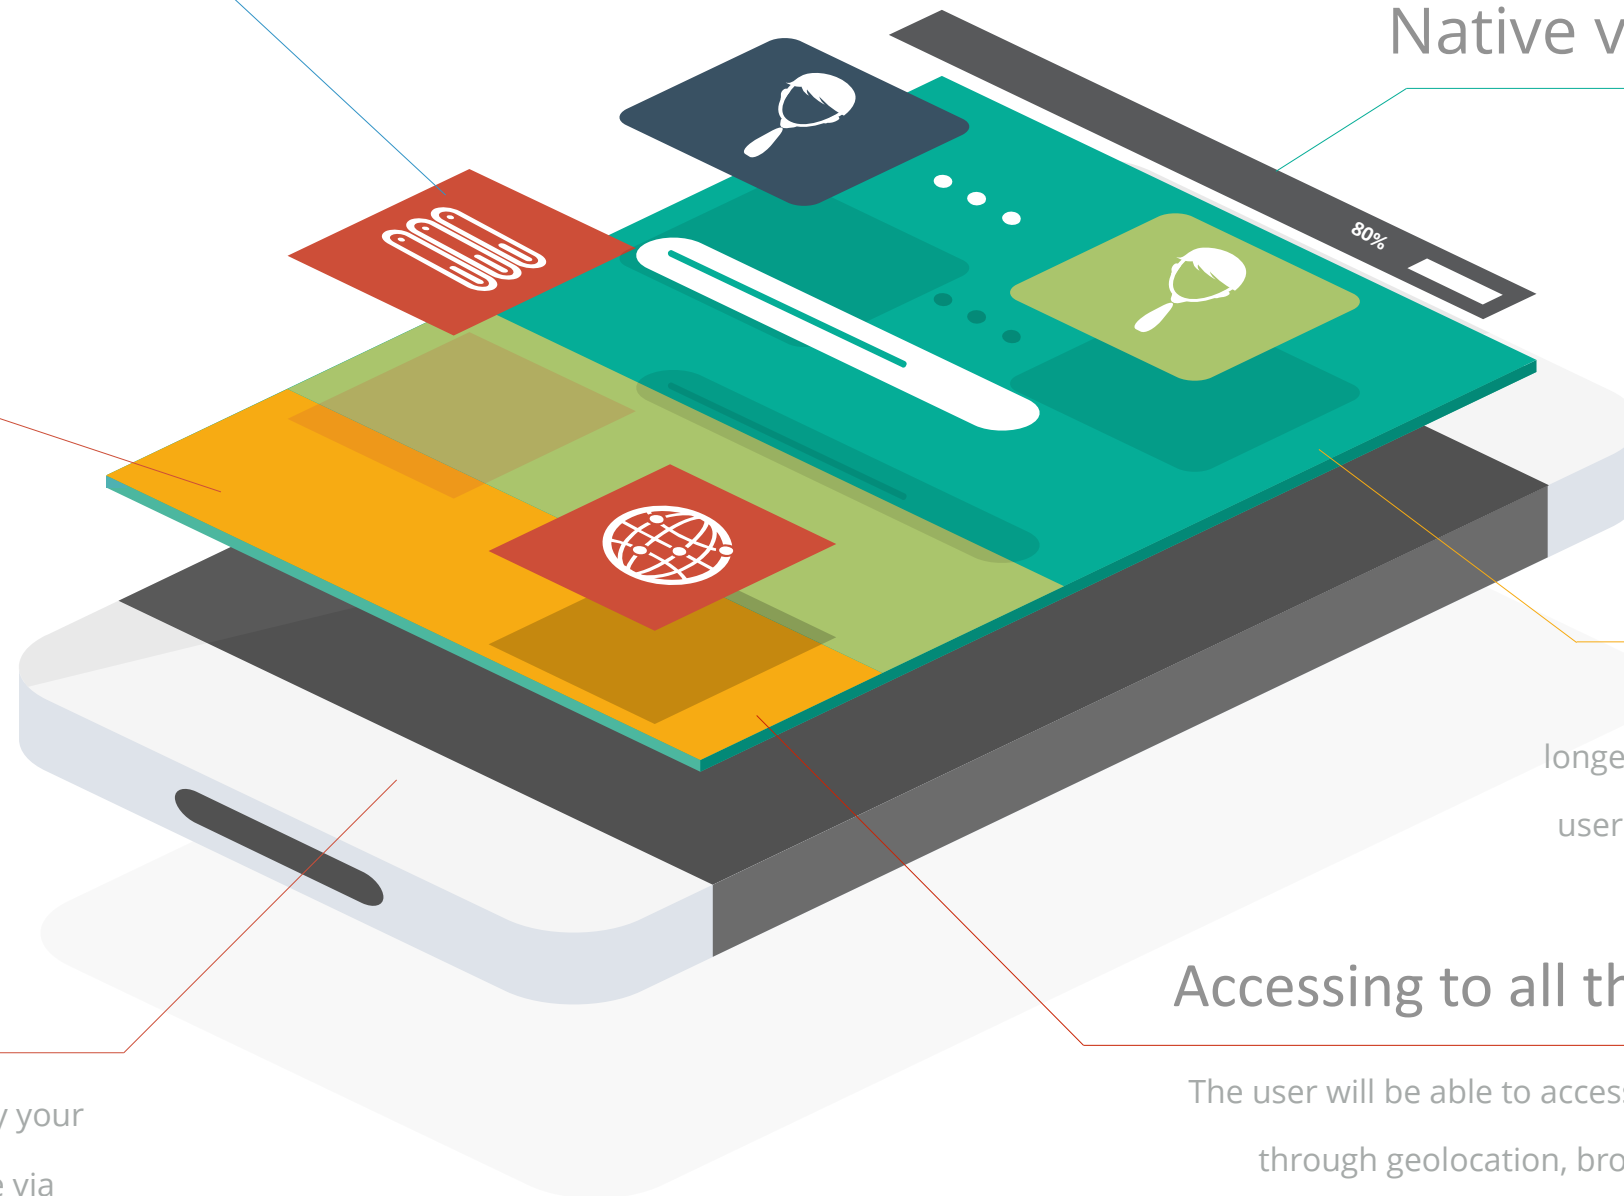

It couldn't be in otherwise: your App will be in perfect harmony with iOS and Android devices.

Geolocation

Finding the Apps that are closer to you will no longer be a challenge. Your App of Apps will let your users find and access to the Apps that are closer to them.

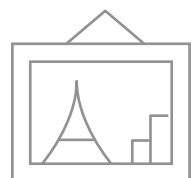

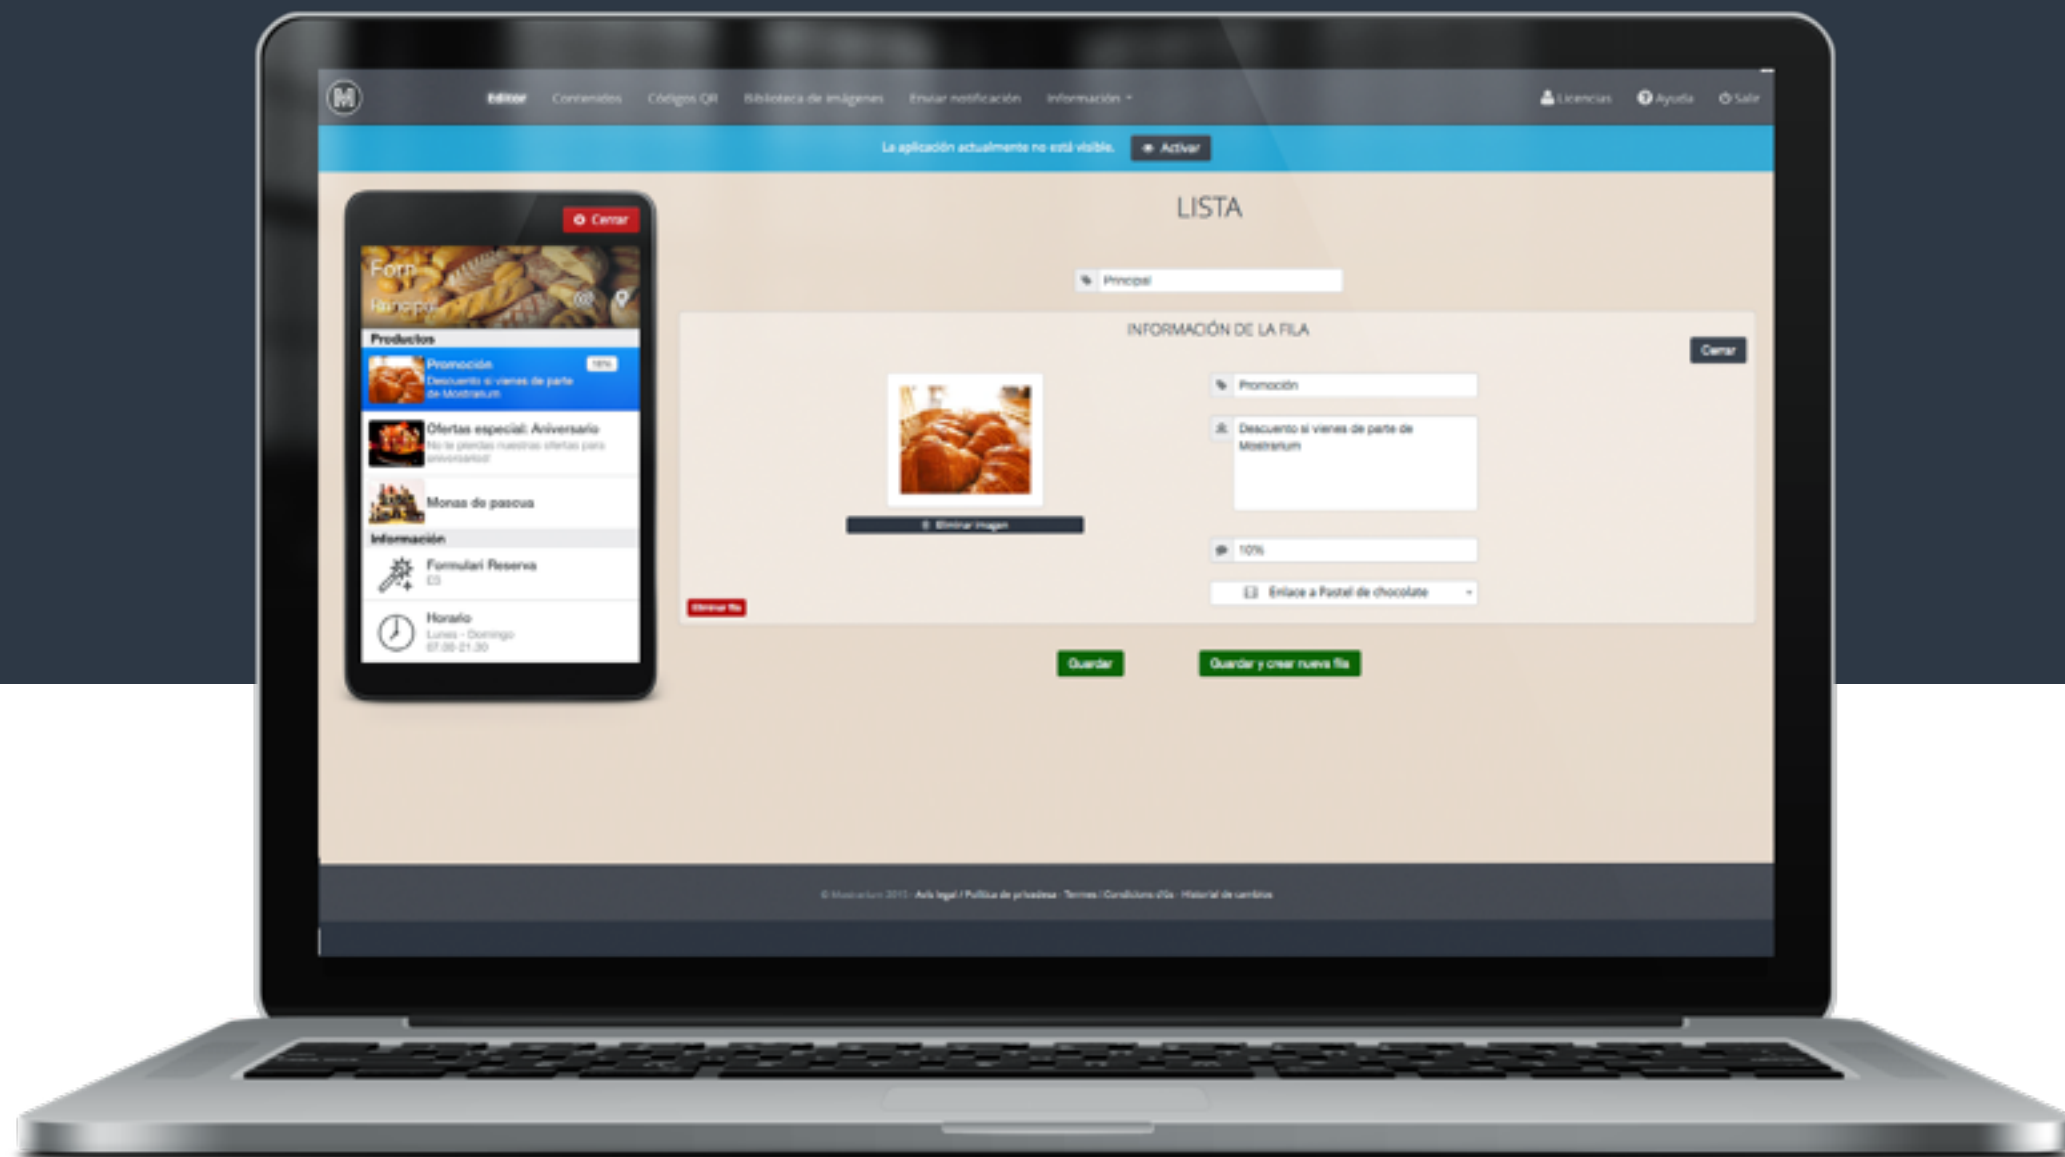

Accessing to all the Apps

The user will be able to access to any App through geolocation, browsing in the categories, searching by words or capturing the QR codes.

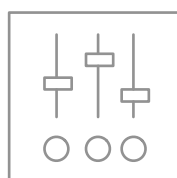

The content manager

Manage your App **without intermediaries**

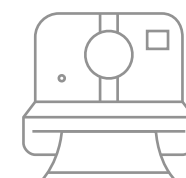

Your contents

Administrare your contents easily from anywhere.

Your settings

You will be able to configure your App according to your communicative needs.

Your diffusion

Through the QR code you will be able to do diffusion of your App and make easier the access of your user.

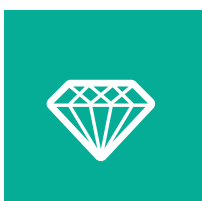

Push notifications

Send messages **to your mobile** users

Events reminder

Tell to all your users when and where will carry out an event and so when they open the App they will see that place in the map.

Real time advise

When you send a push notification, it will be sent in real time to all the users that have your App installed.

Schedule the notifications

It will not be necessary to be in front of the computer to send the notifications. You will be able to schedule and send them in a concrete day and hour.

Received notifications counter

Thanks to the platform you will know how many people has receive your notification. The user will have to accept to receive notifications from your App.

Public road Citizen participation

We offer to you the technology to **encourage the citizen** to collaborate with the maintenance of the public road, and at the same time the technology to **optimize the municipal service resources**.

Perfectionism

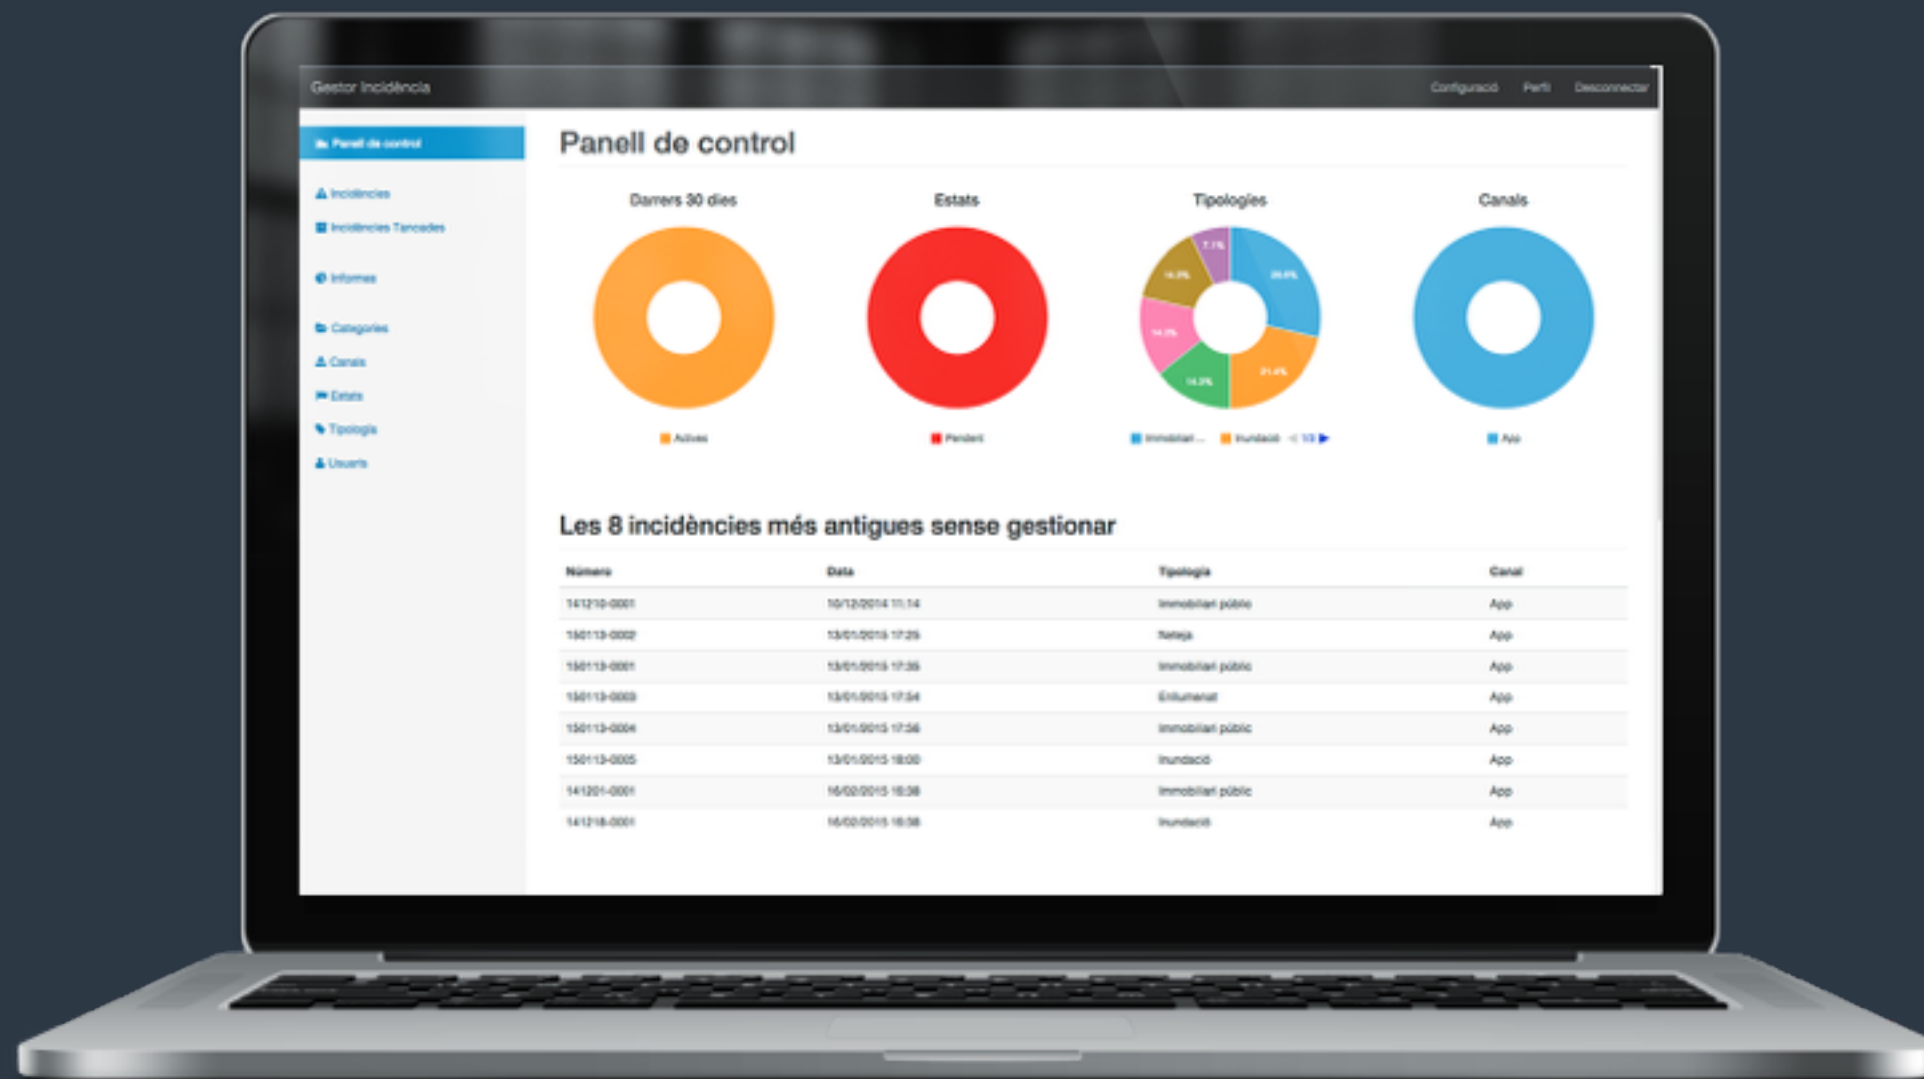

Design made to make it
easy

This platform will allow you to:

- Send any incidence.
- Add pics and geolocation.
- Add your contact data and incidence details.
- Check the status in real time of your incidence.

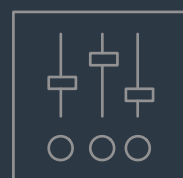

Incidence manager

The most complete tool

Teamwork

You will be able to manage the incidence in group, assigning to every manager.

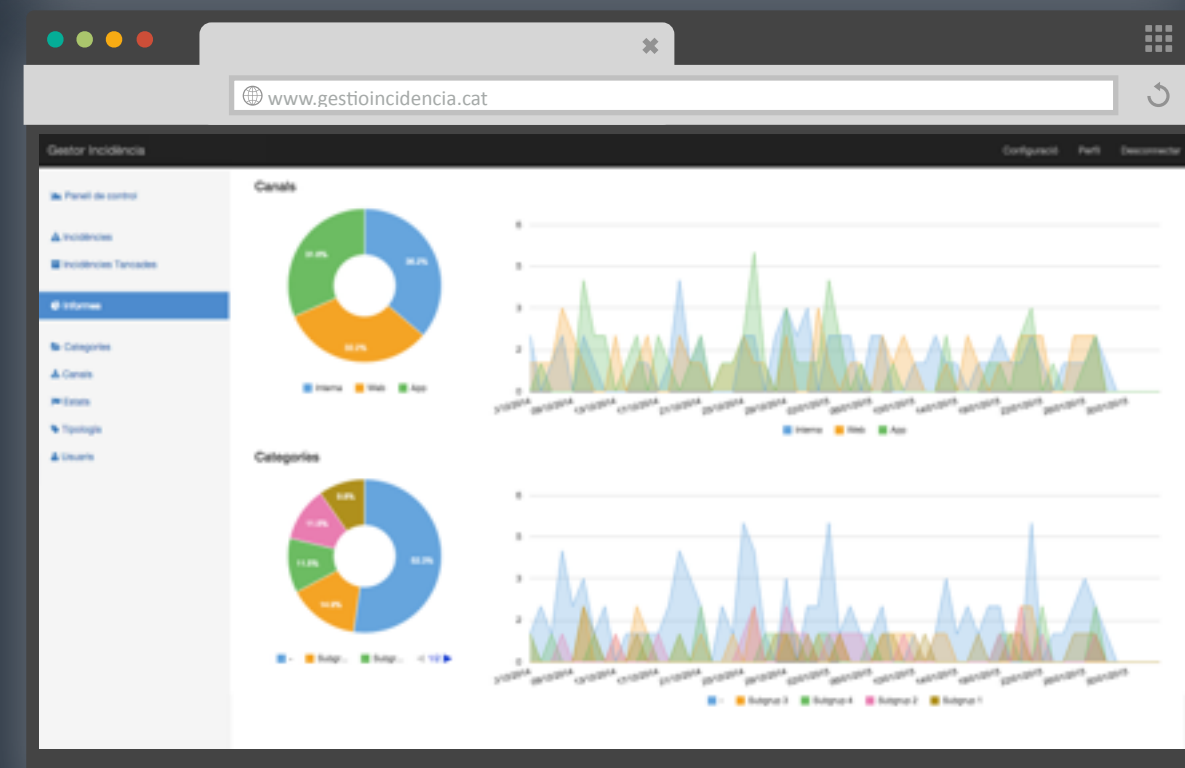

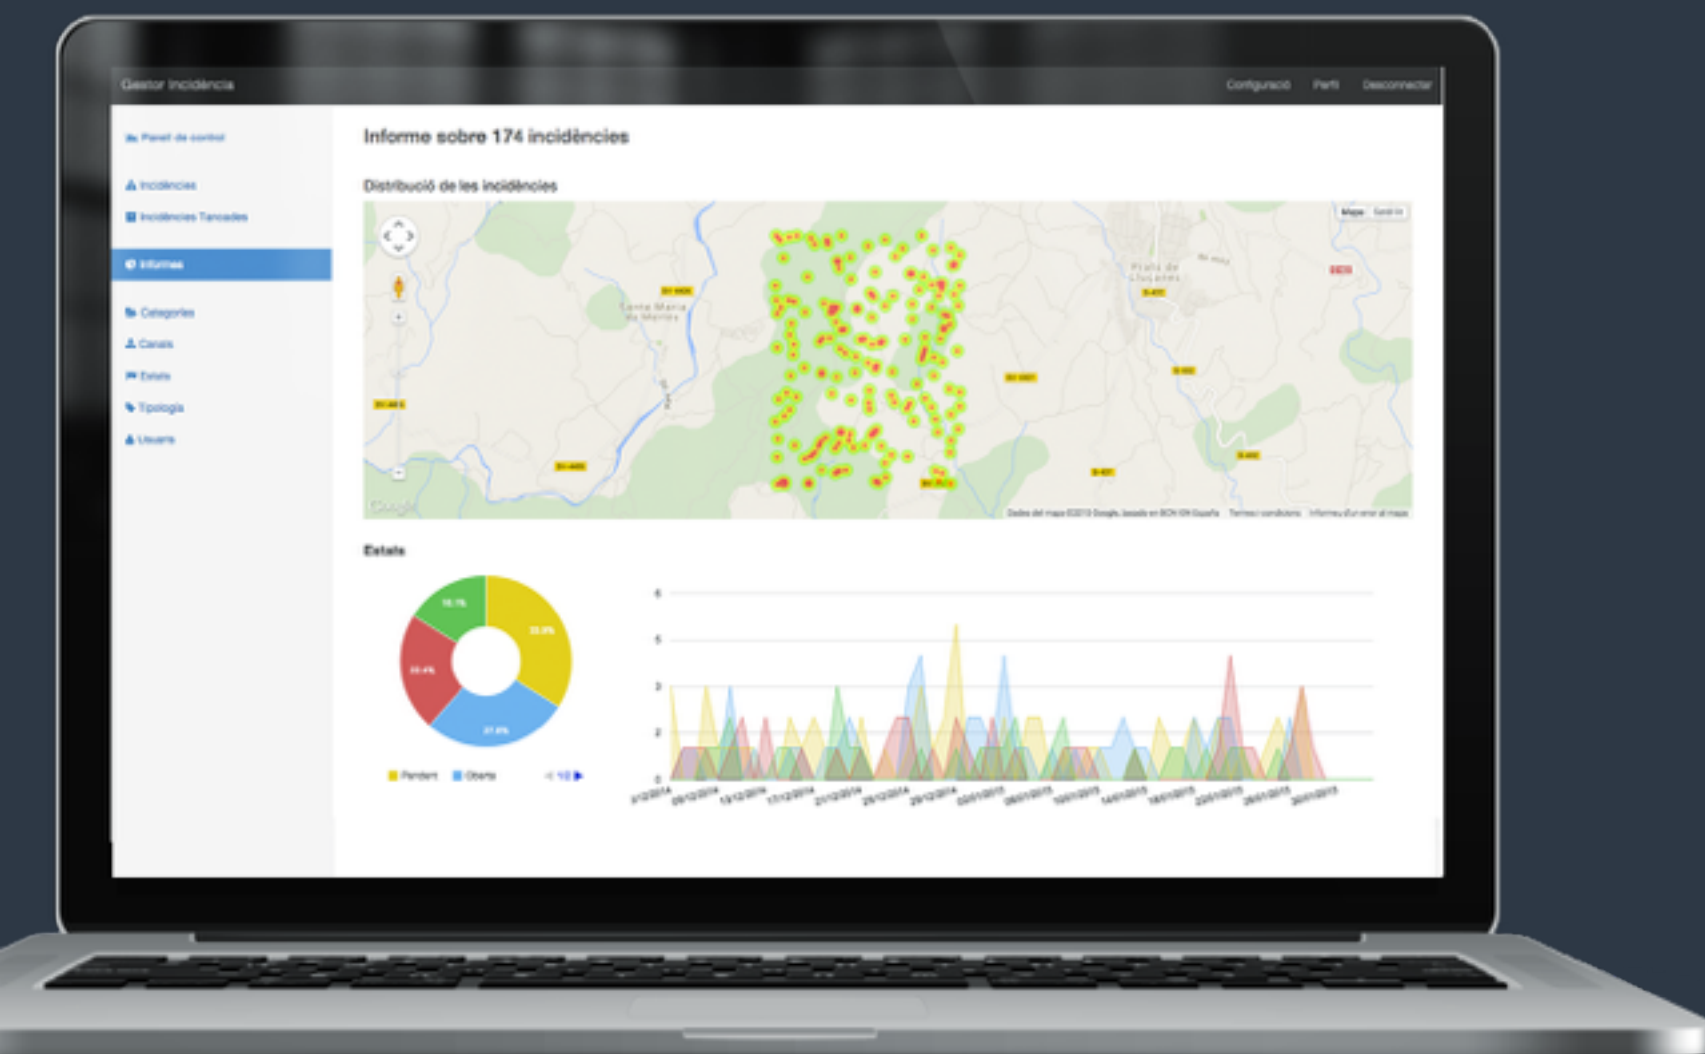

100% Adaptable

We know that your needs are always changing, so your incidence manager has to be adaptable.

Your dashboard

Every user has its own private access with their information and tasks.

Analytic

Access to **statistics and charts**

The platform will show your information like:

- Map with every geolocated incidence.
- Incidence charts according the status.
- Incidence charts according with incidence typologies.
- Incidence charts according with categories and channels.

Guarantee & commitment

Thought to be **easy**

MANAGEMENT

»
We guarantee that the service will be always active and working.

ADAPTATION

»
Even if there are third party updates (OS, servers...), the Apps will keep running.

IMPROVEMENTTTT

»
Constantly, the platform receives service and provision improvements. Those improvements will be automatically implanted.

SUPPORT

»
We have specific customers service for the people authorized managing the platform.

TRAINING

»
Defined training sessions for the platform managers.

PUBLICATION

»
We publish your App. You will not have to worry about nothing.
